

## Underwater Tank

- There are 5 windows approximately 2ft.x4ft. at varying heights around the tank.
- The diameter of the tank is 25ft. and the depth is 14.5 ft.
- Water level is 13ft. deep.
- There is a catwalk that runs the perimeter of the tank at the top.
- The rental of the underwater tank has a two day minimum, which includes labor for tank set up.
- The temperature can be maintained in the 90's year round.
- The cost of a stand-by plumber to maintain water during shooting is additional; having one is optional.
- Tank set up such as normal chemical, heat, filtration, and plumbing time, is included in the location fee.
- Weekends will have additional plumbing charges.
- Call plumbing to discuss tank usage.
